

FEBRUARY 2018

POWELL MONOGRAPHIC CATALOGUE

Six years after its launch, the Powell seating system gets an update and 'debuts' its latest versions. Many new pieces were added to complement the already ample array of existing elements, expanding the system's composition options.

The dedicated catalogue offers an extensive portrayal of the series of cozy additions, through an impressive collection of photos that skillfully highlight the design features of this seating system. The technical sections are complete with designs and detailed information about the product and suggested decor solutions.
