

NOVEMBER 2018

"THE CAP ADRIANO EXPERIENCE" BY MINOTTI

On Friday October 26th a very selected group of high-profile guests, including designers, architects, journalists and design connoisseurs, participated in an exclusive event at **Cap Adriano**, in the Calvià neighborhood on **Mallorca**, for the presentation of the magnificent residential project developed in partnership by Minotti, **Terraza Balear** and **Engel & Völkers**.

This exceptional project took place in a spectacular 1000 m2, two-story home by **GRAS Arquitectos**. The sophisticated interior – designed entirely by Minotti Studio and Terraza Balear – seamlessly blends the elegant, timeless style of Minotti furniture with the Mediterranean aesthetic typical of the island.

Entertained by a delightful opera performance, the guests had an up-close experience with the unrivaled beauty and luxury of the home's interior and exterior, furnished with an accurate selection of Minotti furniture, including best- and long-sellers and the most recent pieces from the **2018 Collection**.

In addition to a gorgeous view overlooking the ocean (thanks to the massive floor-to-ceiling windows), the home has six bedrooms, six baths, three living areas, a gym and an outdoor pool.

The interiors were interpreted through a soft palette of beige and cream tones that convey a refined, contemporary vibe. This impeccable blend of colors, paired with fine finishes and natural materials like wood and stone, lends personality and authenticity to the entire project.

This event further strengthens the highly-successful partnership between the company and Terraza Balear, and firmly establishes the brand's presence in a growing market that has consistently shown its appreciation for the uniqueness of the Minotti collections and the quality of Italian-made products.
