NEWS FROM XIAMEN: THE LATEST COLLECTION IS IN TOWN

The **Minotti Xiamen** by **Casa Bella** flagship store welcomes the **2021 Collection** in a space spanning 1100 sqm laid out over two floors, in the heart of the famous northwestern area of the Chinese city.

The showroom is characterised by extraordinarily striking decorative elements that enhance the architecture: settings in Calacatta marble, partitions in Liquorice-stained larch and floors in the same type of wood bring to life a sophisticated interplay of reflections and contrasts.

The entrance hosts two of the brand's most representative furnishing pieces: on the left, a living area in which the versatile **Roger** seating system by **Rodolfo Dordoni** is the protagonist, characterised by the graphic palette of the Mosaic Jacquard fabric, in which the use of black and white is repeated in the marble of the coffee table and in the armchairs, both from the **Lido** family by **GamFratesi**, then also continuing seamlessly to the surrounding environment.

In fact the composition is designed to fit perfectly into the store in a context featuring dark shades and precious details, creating an almost dramatic effect where the graphic accents of black and white are softened by the mellowing blue shades of the rug and cushions.

On the other hand, the next setting features **Connery**, also by the Milanese architect: in this space, formal rigour gives way to a more relaxed and creative use of colour, in which the leitmotiv is again elegance and simplicity, but with different colour palettes that explore shades of green in the leather sofa base, cushions and armchairs, and in the **Cesar** coffee table by **Rodolfo Dordoni**.

The interior design project by **Minotti Studio** also proposes other best sellers from the Minotti collections, starting from the dining rooms, with the recent **Marvin** and **Linha** tables, respectively by **Rodolfo Dordoni** and **Marcio Kogan / studio mk27**, and extending to the master bedroom, developed around **Brasilia Bed**, designed by the architect from São Paulo.

Minotti Xiamen introduces a selection of furnishing pieces that cleverly conveys the values and savoir-faire of the brand in a strategic market for Minotti, increasingly receptive to quality and Made in Italy charm.
