

AUGUST 2022

NEWS FROM MINOTTI CHENGDU

The modern architecture of the **Minotti Chengdu by LHC** flagship store, located in the elegant financial district of the dynamic Chinese metropolis, houses a new setting for the indoor and outdoor furnishing pieces of the **Minotti** collection.

The display develops around a large fireplace in Tobacco-stained chestnut: the settings follow one another in an articulated and harmonious way, welcoming the most representative projects of the recent **Minotti** collections, such as the **Brasilia** seating systems by **Marcio Kogan / studio mk27**, as well as the **Freeman**, **Mattia** and **Roger** seating systems by **Rodolfo Dordoni**.

The **Studio Collection** has its own emblematic area: the **Daiki Studio** armchair and the **Linha Studio** desk by **Marcio Kogan / studio mk 27** are furnishing pieces designed for today's new home working environments.

The different spaces are defined by large doors in black mirror, while systems of rotating slats lacquered in a welcoming shade of "Warm Grey" act as a delicate filter between the various environments.

A new layout that expresses the brand's attention to detail, with a strong focus on lifestyle: a design destination that fully respects the Minotti style
