Structure: in plywood of various thicknesses. The seat structure is made of numerous layers of variable-density high-resilience polyurethane foam. Seat structure is covered in lightweight quilted material filled with high-loft channelled goose-down padding, to lend greater softness and increase comfort. The down undergoes routine sanitization as specified in EC Regulation No. 1069/2009 (Assopiuma Gold Label certified). The quilted padding is then encased in breathable heat-bonded fibre laminated to white hypoallergenic cotton fabric. The armrest and backrest structures are composed of variable-density high-resilience polyurethane foam, then encased in quilted breathable heat-bonded polyester fibre laminated to white cotton canvas fabric. All materials employed in manufacturing the quilted padding are hypoallergenic. Tailoring of all the upholstery (seat/backrest/armrests) is characterised by asymmetrical double-stitched seams that join the various pieces of fabric or leather previously laminated to heat-bonded fibre with the white cotton fabric. This singular tailoring process is further distinguished by piping, which enhances the haute couture aspect of the workmanship, a distinctive trait of the system.
