

SOFTCASE

HANNES PEER DESIGN

Softcase was conceived as an architectural system designed to define the living space, rather than simply furnish it. Its construction, articulated in elements that interact with precision, gives the composition a distinctive character. The variety of configurations and the breadth of customization options allow for ever-changing arrangements, tailored to both the environment and the sensibility of those who live in it. An open, evolving project that establishes itself as a focal presence at the centre of the room.

The arrangement depicted is just one example of the many different compositions possible with our seating systems. We suggest that you contact the nearest Minotti dealer to explore the options most suited to your needs and select the upholstery of your choice from the exclusive Minotti collection.
