

JULY 2019

DANIELS MONOGRAPHIC CATALOGUE

The **Daniels** seating system designed by **Christophe Delcourt** and presented last April during the Salone del Mobile.Milano event, makes its debut with a full dedicated catalogue.

Innovative and truly original, and at its most striking when paired with the Amber coffee tables-low units, Daniels is the product of a cleverly-developed design that responds to the requirements of very diverse spaces and architectures, comparable to a landscape design project.

The system can be composed in an infinite array of modular solutions to create living areas with a strong visual impact where regular curves and ellipses interrupt the linearity of the configuration, imbuing it with a dynamic, contemporary feel.

In addition to the large photo gallery, at the end of the catalogue there are technical sections with drawings and detailed information about the product and materials, together with suggestions for arrangements in both the residential and hospitality environments.
