

OCTOBER 2019

MALLORCA, VILLA SEAHOUSE

On 10th October, a very selected group of high-profile guests, including designers, architects and journalists, participated in an exclusive event for the presentation of the magnificent **Villa Seahouse** residential project in **Mallorca**, furnished with an accurate selection of pieces chosen from the most recent Minotti collections.

The villa and adjacent guest house sit on a surface of 900 sqm in one of Mallorca's most desirable locations. Designed by Architect **Achim Marwitz** in collaboration with **Terraza Balear**, the reference interior design studio for the project and exclusive dealer of Minotti in the Balearic Islands, the two dwellings offer panoramic views of the bay and open sea. Terraza Balear has given life to bright and inviting interiors of unparalleled aesthetics using soft natural tones and textures, meticulously selected to reflect the tranquillity of the Mediterranean.

The guests had an up-close experience with the unrivalled beauty of the home's indoor and outdoor spaces, seamlessly blending the elegant, timeless style of the Minotti furniture with the Mediterranean aesthetic typical of the island.

This event further strengthens the highly-successful partnership between Minotti and Terraza Balear, and confirms the brand's presence in a growing market that has consistently shown its appreciation for the "Made in Italy" quality.
