

MARCH 2021

CONNERY, BLAZER, TORII AND HAMILTON MONOGRAPHIC CATALOGUES

From March onwards, the monographic catalogues dedicated to the **Connery**, **Blazer** and **Torii** seating systems, all part of the **2020 Collection**, and the updated catalogue for the **Hamilton** seating system will be available at the Minotti flagship stores and authorised dealers.

The seating systems are showcased in all the volumes by means of a captivating series of photos, geared to promote their extreme versatility in different surroundings, and technical sections with drawings and detailed information about the products and materials, to complement the design.

The **Connery** seating system by Rodolfo Dordoni stands out for its geometric rigour and accurate craftsmanship. An extremely versatile seating system created with a clever combination of exquisite materials and sophisticated details, adding a touch of elegance to its design.

Blazer, also designed by Rodolfo Dordoni, is a modular seating system composed of pure shapes, exuding contemporary charm. The unique matelassé effect that characterises the entire surface of the upholstery enhances its silhouette and offers an immediate sensation of comfort.

Torii, designed by Nendo, is an aerial system featuring combinable seats that play with the round volumes, slender lines and apparent formal simplicity of a sophisticated design. The slim backrest features vertical quilting effects, and piping that runs all the way round the cushioning, underlining the exquisite quality of the craftsmanship.

In addition to the three volumes, the updated monographic catalogue dedicated to the iconic **Hamilton** seating system by Rodolfo Dordoni will also be available, characterised by a collection of unpublished images introducing six brand new seating elements and the new Bronze finish of the base, to complement and complete the wide range of existing elements.
